

Prices will rise in New York City metro as new immigration policies impact crucial sectors of New York City's labor force

Nationwide, American families are expected to see a **\$2,150 annual increase** to the combined everyday goods and services they purchase under new immigration policies expected from the Trump administration.

This will mean a **14.5% increase on food, 6.1% on housing, and a 3.9% increase to leisure and hospitality services** by the end of 2028.

New policies that will most significantly, and unnecessarily, raise the costs of goods and services include:

- Cancellation of work permits for millions of individuals with a temporary status, like people with Temporary Protected Status (TPS) who are unable to return to their countries, paroled immigrants from Afghanistan and Ukraine, and Deferred Action for Childhood Arrivals (DACA), among others.
- Mass deportations of millions of immigrants without legal status.
- Significant reductions in new, lawful immigration in the years ahead.

In New York City metro, this would lead to thousands of removed workers from agriculture, construction, and leisure and hospitality industries.

Estimated number of impacted workers, by industry

Industry	Expiration of work permits for temporarily protected workers	Deportation of 1 million immigrants without legal status each year	Reduction of future legal immigration by half
Agriculture-Food	300	1,200	200
Construction-Housing	57,200	43,400	13,000
Leisure-Hospitality	34,900	23,600	33,000
Other industries	174,400	163,200	152,200
All industries	266,800	231,400	198,400

Note: Estimates rounded to thousands.

Under these immigration policies, **New York City metro's economy could lose up to \$25.4 billion annually**, in addition to millions in foregone state and local taxes contributed by these workers each year.

Business leaders, immigrant advocates, workers, and Americans need to tell Congress and the Trump administration that they can't take this additional hit to their wallets.
